OnCommand® Connection Now Integrated With Axis TMS Fleet Management Solution

LISLE, Ill., July 26, 2018 /[PRNewswire](#)/ -- OnCommand® Connection telematics has been integrated with the software of Axis TMS, a leading provider of transportation management software, which will also act as a reseller of OnCommand Connection telematics devices.

"Working closely with our truck customers, we are keenly aware of the added value a leading fleet management software provider like Axis TMS can deliver when it is integrated with the up-to-the-second information about individual trucks and drivers that is provided by our OnCommand Connection telematics," said Andrew Dondlinger, Navistar vice president and general manager, Connected Services. "We are pleased to welcome Axis TMS to our value added reseller network and as an integrated partner."

"This integration provides our mutual customers with an enhanced ability to manage their operations, dispatch and fleet movements," said Axis TMS President and Founder Al Ceric. "We look forward to working with OnCommand Connection going forward to further enhance our customer solutions."

OCC Technologies, LLC offers its OnCommand Connection telematics device, an all-makes, all-models solution that plugs into the truck's diagnostic service port. The telematics service is integrated with OnCommand Connection Electronic Driver Log (EDL), which automates federal Hours of Service compliance requirements. The integration with Axis TMS allows vehicle information, GPS coordinates and driver Hours of Service data to be automatically provided from the OnCommand Connection system to Axis TMS customers.
