IC Bus expands CE Series passenger capacity

Updates provide flexibility without compromising current model wheelbase measurements

LISLE, Ill. (December 7, 2021) – IC Bus®, the leading school bus manufacturer and subsidiary of Navistar, announced today it will offer an expanded capacity option for its flagship CE Series bus.

“As our flagship model, we are constantly looking for ways to refine our CE Series product to continue providing customers with the best bus for their operations,” said Trish Reed, vice president and general manager, IC Bus. “With

> *“With its standout safety and technology features, additional passenger capacity on the CE Series has been a top customer request, and we are happy to deliver greater flexibility on this customer preferred bus," said Trish Reed, vice president and general manager, IC Bus.* ”

its standout safety and technology features, additional passenger capacity on the CE Series has been a top customer request, and we are happy to deliver greater flexibility on this customer preferred bus."

The new 35' 08" bus body option provides customers flexibility by allowing expanded capacity up to 83 passengers, or additional seat spacing configurations for more passenger room.

The expanded CE Series model is available with a 276" wheelbase for diesel, gasoline and propane fueling options. It is available for order beginning this month.

The IC Bus CE Series offers best-in-class driver ergonomics and is a standout in safety and technology by being the first Type C bus with electronic stability control and active collision mitigation standard. To learn more, visit www.icbus.com/buses/school/ceseries.
