Catrina Mitchell-Adegbemi named Senior Vice President, Chief Technology Officer at International

LISLE, Ill. (Jan. 20, 2026) – International Motors, LLC* ("International") has appointed Catrina Mitchell-Adegbemi as Senior Vice President, Chief Technology Officer.

Mitchell-Adegbemi will lead Research and Development (R&D), driving the

delivery of high-quality, timely, and cost-effective solutions across International's product roadmap. She will also represent International as a member of the TRATON R&D management team, ensuring North American customer needs are met through globally integrated innovation.

"Catrina's leadership and ability to inspire teams make her the ideal candidate to lead International R&D," said International President and CEO Mathias Carlbaum. "Her track record of collaboration and results will be critical as we advance our product strategy and deliver for our customers."

With more than two decades of experience at International, Mitchell-Adegbemi brings deep expertise in engineering, product development, and operations to this role. Her proven ability to connect teams and accelerate innovation positions her to strengthen North American product offerings and deliver solutions that move customers forward.

"I'm honored and humbled to take on this role at such a transformative time," said Mitchell-Adegbemi. "Together with our talented teams, we will deliver innovative, customer-focused solutions that meet evolving market needs."

Mitchell-Adegbemi holds a bachelor's degree in electrical engineering from the University of Illinois Chicago and an MBA from DePaul University, reflecting her strong technical and business acumen.
